

CHROMIUM HYDROXIDE CHLORIDE POWDER

CCLP

CHROMIUM HYDROXIDE CHLORIDE CCLP POWDER is a Basic Chromium Chloride Powder, spray dried for easy use in process applications.

CHROMIUM HYDROXIDE CHLORIDE CCLP POWDER is used for its ease of solubility and cross-linking properties as an intermediate in the chemical industry, and to increase the viscosity of certain polymer fluids in Oil and Gas Drilling Fields.

It is highly soluble in cold water and also soluble in certain organic solvents such as methanol and formamide.

SPECIFICATION:

Appearance	:	Spray Dried Fine Powder
Colour	:	Green
Specific Gravity	:	1.00 - 1.05
Cr Content	:	30.5 - 32.5 %
Cl Content	:	32.0 - 35.0 %
Basicity	:	48 - 50.5 %

**Packages : Polypropylene / Polythene bags containing 25kg nett,
Polythene-wrapped Pallets containing 500 kg nett.**
